介绍 (中文)

基本信息

此文本嵌入为负面文本嵌入。它能够在对画风影响较小的前提下改善AI生成图片的手部细节。如果它让你的模型表现得比以前更糟，请勿使用它。您可与其他负面文本嵌入一起使用。

它们记录了一系列这种AI“画错了”的方式

那就只需要让它避开这些错误案例就行了

Original Hugging Face Repository

Simply uploaded by me, all credit goes to <https://huggingface.co/gsdh>.

Counterfeit-V2.5 (which has 2.0 as well) on Civitai - <https://civitai.com/models/4468/counterfeit-v25>

If you like this embedding, please consider taking the time to give the repository a like and browsing their other work on HuggingFace.

This embedding should be used in your NEGATIVE prompt. Adjust the strength as desired (seems to scale well without any distortions), the strength required may vary based on positive and negative prompts. Use the EasyNegative_pt (PickleTensors) version if you are unable to use SafeTensors embeddings.

它同样也只需要一个提示词来激活

进阶模型概念铺垫

Embeddings (词嵌入) 的概念及三种应用

LoRa (低秩适应模型) 概念简析

Hypernetwork (超网络) 概念简析

Original Hugging Face Repository

Simply uploaded by me, all credit goes to <https://huggingface.co/gsdh>.

Counterfeit-V2.5 (which has 2.0 as well) on Civitai - <https://civitai.com/models/4468/counterfeit-v25>

If you like this embedding, please consider taking the time to give the repository a like and browsing their other work on HuggingFace.

This embedding should be used in your NEGATIVE prompt. Adjust the strength as desired (seems to scale well without any distortions), the strength required may vary based on positive and negative prompts. Use the EasyNegative_pt (PickleTensors) version if you are unable to use SafeTensors embeddings.

Samples are, in order:

1. sample01 - Counterfeit-V2.0.safetensors
2. sample02 - AbyssOrangeMix2_sfw.safetensors
3. sample03 - anything-v4.0-pruned.safetensors
4. Strength comparison using AbyssOrangeMix2_sfw.

From Author

"This is a Negative Embedding trained with Counterfeit. Please use it in the "\stable-diffusion-webui\embeddings" folder. It can be used with other models." Hide

它是一种综合的、全方位的基于负面样本的提炼

About this version

例如EasyNegative是基于Counterfeit去训练的

Discord Twitter Reddit A.I. Status

作者测试了对大多数二次元模型都有效
